

# Molly Mine Stitch and Flip Crazy Quilt Tutorial

There are two files for each block

The first file is a QE file. This file has only a thin zigzag and has a ¼ inch seam allowance and will be the one you will want to use if making a quilt.

The second file has an applique edge for putting the block onto projects and will have a full applique border. **Do not** use this file if you are making a quilt and plan on joining the blocks together without sashing. You can use the ap file if you are stitching onto a fabric that will be used as part of the front of the quilt as sashing.

Begin by hooping your stabilizer and fabric. You can stitch right on stabilizer as long as you are not using tear-a-way and not using the AP file.

When cutting your fabric you will want to cut the pieces very generous since only the first piece will be cut on the actual line.

Occasionally there will be a motif that must be stitched before a fabric is placed, those instructions will be on the chart so please read each chart for individual blocks.

If you would rather watch a video tutorial for a stitch and flip block you may view it here: <https://www.youtube.com/watch?v=I92jkrW0ARI&t=67s>

Step 1 will show you the entire outline of your project.

Place your fabric over the area shown on the chart. Run step 2

Trim inside fabrics next to line. If the first fabric is next to the edge leave trim only inside areas

Lay your next fabric face down along the seam of the first fabric as shown. Run step 3

Flip your fabric over and run step 4  
Trim inside edges

Repeat steps until all fabric is placed
